ENTERED AT SAN FRANCISCO, CAL. AS SECOND-CLASS MATTER

Warbasse's Surgical Treatment

*Military * Industrial * Minor * Major*

Military because it gives particular attention to the modern treatment of infected wounds with antiseptics, and by methods applicable when these are not available;

to tetanus, gas bacillus infection, erysipelas, syphilis and other surgical fevers and infections;

to shock and acidosis;

to operations on the abdomen; bloodvessel, nerve, and tendon surgery;

to bone-cavity filling, ankylosis, bone grafting, foot conditions, and rehabilitation;

to plastic operations and amputations with their limitless possibilities;

to transportation of the wounded.

Industrial because it is unusually full on injuries, the results of injuries, and their relief and correction;

Three octavos total 3000 pages, with a *Separate Desk Under Volume*. By JAMES PETER WARBASSE, M. D., Surgeon to the Wyckoff Heights Hospital, Brooklyn, N. Y.

W. B. SAUNDERS COMPANY

Philadelphia and London

on fractures, dislocations, and joint-fractures;

on accidents from electricity, gas burns, suffocation, drowning, etc.;

on bandaging—showing this subject as an art;

on the preparation and use of emergency dressing materials and on extemporizing surgical instruments and appliances.

Minor and Major because it gives extended consideration to every department of surgery, both general and special; to hygienic treatment and diet; to preparation for operation, operative technique, and after-care; to the use of vaccines, serums, bacterins, and blood products; to the graphic depicting, step by step, of methods and procedures, major and minor, by 2400 original illustrations.
